expert training

# Advanced malware analysis techniques

---

Course  
program

Nº	Track	What you will learn/practice	Lesson	Practice
0	Course overview	<ul style="list-style-type: none"> <li>• About your trainer</li> <li>• Course roadmap</li> <li>• Course structure</li> </ul>	Course overview	—
			Virtual lab introduction	—
1	Intro	<ul style="list-style-type: none"> <li>• Routine IDA Pro tasks: navigation, functions, code and data manipulation</li> <li>• Advanced features of IDA Pro: structure types, fields, shifted structure pointers</li> <li>• Code and data flow analysis</li> <li>• Stack arithmetics</li> </ul>	Intro: Mission briefing	Intro: exercise 1
			Intro: solution for exercise 1. Next steps	Intro: exercise 2
			Intro: solution for exercise 2. Pointer into the middle of a structure	Intro: exercise 3
			Intro: solution for exercise 3. Stack frame and stack pointer	Intro: exercise 4
			Intro: solution for exercise 4. Further analysis	Intro: exercise 5
2	Shell	<ul style="list-style-type: none"> <li>• Code and data flow analysis</li> <li>• Stack mechanics and data layout</li> <li>• Manual reconstruction of data structures</li> </ul>	Shell: mission briefing	Shell: exercise 1
			Shell: solution for exercise 1. Further analysis	Shell: exercise 2
			Shell: solution for exercise 2. Conclusion	Shell: exercise 3
3	Msfvenom	<ul style="list-style-type: none"> <li>• Analyzing PowerShell scripts</li> <li>• Decoding Msfvenom (Metasploit) payloads</li> <li>• Manual reconstruction of data structures</li> </ul>	Msfvenom: mission briefing	Msfvenom: exercise 1
			Msfvenom: solution for exercise 1. Further steps	Msfvenom: exercise 2
			Msfvenom: Solution for exercise 2. Conclusion	—

Nº	Track	What you will learn/practice	Lesson	Practice
4	Bangladesh GPCA	<ul style="list-style-type: none"> <li>Code and data flow analysis</li> <li>Recognizing a well-known encryption algorithm</li> <li>Automating decryption with a decoding framework</li> </ul>	Bangladesh GPCA: mission briefing	Bangladesh GPCA: exercise 1
			Bangladesh GPCA: solution for exercise 1. Decryption	Bangladesh GPCA: exercise 2
			Bangladesh GPCA: solution for exercise 2. Decoding framework	Bangladesh GPCA: exercise 3
			Bangladesh GPCA: solution for exercise 3. Conclusion	—
5	Regin driver	<ul style="list-style-type: none"> <li>Analyzing a homebrew crypto algorithm</li> <li>Raw offset - virtual address conversions</li> <li>Automating decryption of PE files</li> </ul>	Regin driver: mission briefing	Regin driver: exercise 1
			Regin driver: solution for exercise 1. Next steps	Regin driver: exercise 2
			Regin driver: solution for exercise 2. Conclusion	—
6	Decrypt strings	<ul style="list-style-type: none"> <li>Analyzing a homebrew crypto algorithm</li> <li>Automating decryption of Mach-O files</li> <li>Processing multiple encrypted strings, referenced as function arguments</li> </ul>	Decrypt strings : mission briefing	Decrypt strings: exercise 1
			Decrypt strings: solution for exercise 1. Next steps	Decrypt strings: exercise 2
			Decrypt strings: solution for exercise 2. Conclusion	—
7	Driver	<ul style="list-style-type: none"> <li>Processing encrypted strings, preparing the sample for the analysis Applying structures, enumerations</li> <li>Re-creating a C++ class/structure</li> <li>In-depth reverse engineering of a sample</li> </ul>	Driver: mission briefing	Driver: exercise 1
			Driver: solution for exercise 1. Next steps	Driver: exercise 2
			Driver: solution for exercise 2. Next steps	Driver: exercise 3
			Driver: solution for exercise 3	—

Nº	Track	What you will learn/practice	Lesson	Practice
			Driver: next steps	Driver: exercise 4
			Driver: solution for exercise 4. Next steps	Driver: exercise 5
			Driver: solution for exercise 5. Next steps. Part 1	—
			Driver: next steps. Part 2	—
			Driver: next steps . Part 3	Driver: exercise 6
			Driver: solution for exercise 6. Conclusion	—
8	Miniduke	<ul style="list-style-type: none"> <li>Processing a custom assembly-coded shellcode</li> <li>Extracting opcode information without a disassembler</li> <li>Reconstructing a custom API hashing algorithm</li> <li>Exporting information to IDA via an IDC script</li> </ul>	Miniduke: mission briefing Miniduke: solution for exercise 1. Next steps Miniduke: solution for exercise 2. Next steps Miniduke: solution for exercise 3. Conclusion	Miniduke: exercise 1 Miniduke: exercise 2 Miniduke: exercise 3 —
9	Rocra	<ul style="list-style-type: none"> <li>Extracting a binary payload from the RTF document</li> <li>Analyzing an exploit's shellcode payload</li> <li>Extracting the final payload from the document</li> </ul>	Rocra: mission briefing Rocra: solution for exercise 1. Next steps Rocra: solution for exercise 2. Next steps Rocra: solution for exercise 3. Conclusion	Rocra: exercise 1 Rocra: exercise 2 Rocra: exercise 3 —
10	Cobalt	<ul style="list-style-type: none"> <li>Using oletools to inspect an OLE2 container</li> </ul>	Cobalt: mission briefing Cobalt: solution for exercise 1. Conclusion	Cobalt: exercise 1 —

Nº	Track	What you will learn/practice	Lesson	Practice
11	Cloud Atlas	<ul style="list-style-type: none"> <li>Extracting binary data from a crafted RTF document</li> <li>Using oletools to inspect an OLE2 container</li> <li>Analyzing binary and scriptable (VBS) payloads</li> </ul>	Cloud Atlas: mission briefing	Cloud Atlas: exercise 1
			Cloud Atlas: solution for exercise 1. Next steps	Cloud Atlas: exercise 2
			Cloud Atlas: solution for exercise 2. Next steps	Cloud Atlas: exercise 3
			Cloud Atlas: solution for exercise 3. Next steps	Cloud Atlas: exercise 4
			Cloud Atlas: solution for exercise 4. Next steps	Cloud Atlas: exercise 5
			Cloud Atlas: solution for exercise 5. Conclusion	—
12	Miniduke PDF	<ul style="list-style-type: none"> <li>Analyzing a malicious PDF document</li> <li>Inspecting a ROP-building Javascript</li> <li>Reconstructing a ROP chain</li> </ul>	Miniduke PDF: mission briefing	Miniduke PDF: exercise 1
			Miniduke PDF: solution for exercise 1. Next steps	Miniduke PDF: exercise 2
			Miniduke PDF: solution for exercise 2. Conclusion	—
13	Ragua Py2exe	<ul style="list-style-type: none"> <li>Extracting a py2exe binary</li> <li>Decompiling Python bytecode</li> </ul>	Ragua Py2exe: mission briefing	Ragua Py2exe: exercise 1
			Ragua Py2exe: solution for exercise 1. Conclusion	—
14	Cridex	<ul style="list-style-type: none"> <li>Dynamically unpacking / decrypting</li> <li>Windows executables</li> </ul>	Cridex: mission briefing	Cridex: exercise 1
			Cridex: solution for exercise 1. Conclusion	—
15	Carbanak	<ul style="list-style-type: none"> <li>Analyzing and dynamically unpacking / decrypting Windows .NET executables</li> </ul>	Carbanak: mission briefing	Carbanak: exercise 1
			Carbanak: solution for exercise 1. Conclusion	—

Nº	Track	What you will learn/practice	Lesson	Practice
16	Snake	<ul style="list-style-type: none"> <li>• Analyzing Golang samples</li> <li>• Mapping basic Golang structures</li> <li>• Extracting and decrypting Golang string literals</li> </ul>	Snake: mission briefing	Snake: exercise 1
			Snake: solution for exercise 1. Conclusion	—
			Course summary	—

# Thank you!
